

GATE CN – Important Formula Sheet

- Propagation Delay = Distance / Speed
- Transmission Delay = Packet Size / Bandwidth
- $RTT \approx 2 \times \text{Propagation Delay}$
- IPv4 addresses = 2^{32}
- Subnets = $2^{\text{borrowed_bits}}$
- Hosts/Subnet = $2^{\text{host_bits}} - 2$
- CIDR block size = $2^{(32 - \text{prefix})}$
